RI TRANSPARENCY REPORT

2019

Morphic Asset Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. In no case, can this report or any content of it be sold to other parties.

Third party organisations who have accessed Transparency reports outside of the Data Portal and intend to use those require the prior written consent of PRI (other than for internal use or research or for the sole benefit of the organisation whose report this refers to).

SG 01.4 Describe your organisation’s investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Our mission is as follows:

- To deliver risk-adjusted returns over the long term, in a responsible way that doesn’t harm the environment, society and doesn’t make the world a poorer place.
- We will have a positive impact both as investors and as a business.
- We will invest in those companies whose products and services have positive impacts.
- We will engage with those companies that need further change for the better and we may act against those companies who fail to recognise their negative impact in order to persuade them of the need for change.
- As a business, we will support charities via donating a proportion of our revenue and by managing assets on their behalf.
- We will promote the adoption of the principals of Responsible Investment throughout the broad investment community.
- Finally, our behaviour as individuals and collectively as a business will reflect the values that are fundamental to our Responsible Investment philosophy.

SG 01.5 Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

The consideration of ESG factors is a natural component of Morphic’s investment process. We believe that understanding material risks and opportunities related to ESG factors, enhances the insights of the conventional investment process. The founders of Morphic have been investing for most of their careers with an investment process that reflects the evolution of Responsible Investment over this period.

Building on an historic approach of excluding companies whose activities are incompatible with our values (known as ethical or negative screening) the identification and consideration of material ESG factors is now fully integrated within our investment process.

Our own experience and a growing body of academic research suggest that incorporating ESG considerations into the investment process can lead to more informed investment decision-making and better investment outcomes for our investors.

Our Responsible Investing Policy (“Policy”) document affirms Morphic’s commitment to responsible investing and outlines our approach to practising responsible investing which comprises of four key components:

- Screening – Negative & Positive
- Integration of ESG considerations in our investment process – research, analysis & investment decision making
- Engagement – with portfolio companies & all relevant stakeholders, & voting appropriately
- Transparency – full disclosure

The Joint Chief Investment Officers are responsible for the implementation of this Policy and it is reviewed on a regular basis and amended to reflect developments in best practice and our commitments to PRI and industry peak bodies (such as RIAA). The Head of Research will be responsible for the annual review in the second quarter of each financial year.

Any changes to this Policy will be advised promptly to all members of the Morpic investment team and our investors by publication on our website. Consistent with our Responsible Investing commitments we provide full transparency on how we integrate ESG into our investment process.

1. Portfolio Holdings - we publish our full list of holdings on our website on an regular basis.
2. Performance Reporting - every month, we provide our investors with a monthly performance report which shows the Funds' top ten holdings (long and short positions).
3. Semi-Annual and Annual Reporting – every six months we provide our investors with extensive commentaries on performance, portfolio management activities and relevant subjects.
4. Voting – we will publish our voting records on an annual basis.
5. Company Engagement – if appropriate we will publicise our engagement with portfolio companies, however, it is often the case that this more effective if kept private.
6. Short Selling – we believe that public disclosure, via articles and blogs detailing our short-selling investment thesis, can have a powerful signalling impact.
7. Other Content – our website contains regular "blogs" and longer articles on specific portfolio companies and relevant subjects.
8. External Media – we regularly contribute to financial newspaper and television and copies of this content can also be found on our website.

SG 03.2 Describe your policy on managing potential conflicts of interest in the investment process.

Per Morphic Responsible Investment Policy, section 5.2 Managing Conflicts of Interest:

Morphic Asset Management (Morphic) maintains a Compliance Manual (signed off by the Independent Board of Directors) which all employees receive on commencement of employment and review annually.

The Compliance Manual provides the framework and rules by which Morphic defines itself and its relationships with its stakeholders including clients, staff and shareholders. Section 3 of Morphic's Compliance Manual "Managing Conflicts of Interest" addresses this specific issue as follows:

- Definition of conflicts of interest
- Procedures for managing conflicts of interest
- Mechanisms for controlling conflicts of interest
- Monitoring and reporting

Description

We were asked to present to the Sydney branch of the Australian Shareholders Association on the subject of "what is corporate social responsibility?". Tying in CSR from a corporate perspective to what we look for in corporate's from an ESG perspective, we used this opportunity to introduce and explain in detail the concept of Responsible Investment. Essentially our point was even if you do not share the values of RI, you should be aware of what it means as an ever greater weight of money will be invested in this way going forward thus impacting your investments. We present regularly to our clients by way of roadshows around various cities in Australia. In total we will be addressing >100 individuals and will always present on an RI topic. We also arrange relevant experts to present on these occasions and these have included two RIAA employees including CEO Simon O'Connor.

LEA 01.6 Additional information [optional]

Our RI Policy covers our active ownership policy under Section 3. Engagement. This refers to voting and references a separate detailed and documented Proxy Voting Policy.

Extracts from our RI policy follow below:

Portfolio Investments

Morphic seeks to actively engage with our portfolio companies to deepen our understanding of management views and strategies on both business and ESG-related issues. This engagement gives us the opportunity to voice any concerns we may have about any material ESG risks that we observe.

When possible, our analysts typically speak with representatives of the companies we are considering for investment to ask a range of questions about their operations, the challenges they may face, and the key conditions required for their success. These may encompass targeted questions relating to specific ESG factors, such as supply chain management, employee relations, environmental risk and mitigation as well as corporate governance. The dialogue with management continues in regular follow-up meetings and conversations after we invest in the company. Analysts are required to keep a record of the key findings from these meetings and monitor the progress of any initiatives discussed.

We will raise our concerns with management if we believe that the company is pursuing a course of action that risks jeopardising the sustainability of the business and is thus detrimental to shareholder value.

Given our relatively small size and the diversified nature of our portfolios, we are realistic about the extent to which we can effect change through active ownership, and we may choose to exit a position in cases of material ESG risks rather than persisting with attempts to engage with an unreceptive management team. Our guiding principle is to act in the best interest of the investors whose money we manage.

Investment Holding Periods

Whilst our investment time horizon is long term it is sometimes the case that the actual holding period is shorter than envisaged (if our expected valuation is reached quickly or our disciplined risk management process dictates the sale of a loss-making investment). In these instances, it may not be possible to effectively engage with companies where material ESG risks have been identified.

Limitations of Direct Engagement & Membership of Shareholder Action Groups

We recognise that our relatively small size may sometimes inhibit our access to management.

Another way our relatively small "voice" can be heard is through membership of groups which bring together shareholders and organise more effective collective engagement on particular issues. We are a founder signatory of Climate Action 100+ an organisation which coordinates engagement with the world's largest corporate CO2 emitters. The purpose of this collective engagement is to improve governance on climate change, curb emissions and strengthen climate-related financial disclosures.

As a signatory we are specifically contributing to the engagement with companies listed in Australia.

We may join other similar collective groups.

Voting

Annual General Meetings (AGM's) are the formal corporate governance mechanism through which shareholders are asked to express their opinion on various important matters such as the composition of the Board of Directors, remuneration policies for senior management, changes to shareholder capital, and appointment of auditors. Extraordinary General Meetings (EGM's) are used to address similar matters such as large corporate transaction on an ad-hoc basis.

For the companies that we invest in, the right to vote at AGM's and EGM's is ultimately owned by the investors in our Funds. We consider it part of our fiduciary duty to exercise these votes in the appropriate manner on their behalf. Our Proxy Voting Policy further details this policy and the voting process.

Investors' Feedback

We believe that our client base is a valuable resource for understanding the world. We welcome investors' feedback on any securities we may hold in our portfolio.

In addition to the legal and regulatory reporting requirements of our Funds, we hold regular "town-hall" meetings to provide updates and to give clients the opportunity to communicate with us face-to-face.

General Engagement

We will regularly engage with other investors and relevant industry organisations (such as PRI, RIAA, ASA) to promote the industry wide integration of ESG issues and to further our knowledge and the development of our own investment process in this regard.

LEA 07.4 Additional information. [Optional]

Insights from engagement will be selectively shared with clients/beneficiaries. The reason for this being that sometimes respecting the privacy of the communications with companies preserves goodwill. Put another way, public disclosure of contentious and negative issues may close channels of communication. Again, this has to be judged on a case-by-case basis. Clearly the passage of time usually enables case studies to be published without impacting on ongoing engagements.

LEA 12.2 Provide an overview of how you ensure your voting policy is adhered to, giving details of your approach when exceptions to the policy are made.

As a responsible investor, we believe that Environmental, Social and Governance (ESG) issues impact the value and reputation of entities in which we invest. We are committed to incorporate ESG standards into our voting criteria to act in the long-term interests of our clients as per our guidelines below:

1. Act in the long-term interests of shareholders.
2. Protect shareholders' rights.
3. Ensure independent, diverse and efficient board structure.
4. Align incentive structures with long-term interests of stakeholders.
5. Disclose accurate, adequate, and timely information.
6. Ensure good environmental and social performance.

Voting decisions are based on the following considerations:

- For: The proposed resolution reflects good practice and is in the shareholders' long-term interest
- Abstain: The proposal raises issues of concern for shareholders or lacks sufficient information
- Against: The proposal is not acceptable and is not in the shareholders' long-term interest

Voting & Decision Making Process

Morphic receives notices of general meetings from its portfolio companies through its custodians or the companies themselves.

Voting decisions are made by the Investment Team on a case by case basis based on the guidelines above. The joint CIO's have the final say on any voting decision.

All of our products have the same concentrated portfolio and therefore we have a relatively small number of voting decisions to take on an annual basis. There will be no exception to the application of the above policy. There will be no exceptions to the application of the above policy.
